Professional Summary

Senior Software Engineer with 7+ years of experience in backend and full-stack development, specializing in Node.js, Express.js, MongoDB, RESTful API design, and scalable microservices. Strong experience building secure APIs, implementing authentication and authorization using JWT, and optimizing backend performance. Hands-on experience with AWS cloud services, serverless components, CI/CD pipelines, and production support, along with application-level Generative AI integrations using OpenAI and Azure OpenAI. Proven Team Lead with Agile delivery, code review ownership, and end-to-end system responsibility.

Technical Skills

- **Backend / Platform:** Node.js, Express.js, TypeScript, RESTful API Design, Microservices Architecture, MVC Architecture, Secure APIs, Authentication & Authorization (JWT), WebSocket, Socket.IO, Performance Optimization, Scalability
 - **Frontend:** HTML, CSS, JavaScript, jQuery, React.js
 - **Databases:** MongoDB (primary), MySQL, PostgreSQL, Data Modeling, Schema Design, Indexing, Query Optimization
 - **Cloud / DevOps:** AWS (S3, Lambda, API Gateway, EC2, RDS, SNS, SQS, IAM, CloudWatch, VPC), Serverless Architecture, CI/CD Pipelines (Bitbucket), Load Balancing
 - **Generative AI:** OpenAI API, Azure OpenAI, Prompt Engineering, Conversational AI, Document Summarization, Semantic Search
 - **Process:** Agile, Scrum, SDLC, Code Reviews, Production Support
-

Professional Experience

Kairos Technologies Inc.

Aug 2018 – Present

Senior Software Engineer / Team Lead

- Designed and developed scalable backend systems using Node.js, Express.js, and MongoDB following microservices and MVC architecture.
- Led API design and development for secure RESTful services with JWT-based authentication and authorization.
- Built and maintained secure APIs supporting chatbot platforms, document-processing pipelines, and automation systems.
- Improved backend performance and system reliability by optimizing MongoDB queries, implementing indexing strategies, and refining data models.
- Implemented cloud-native solutions on AWS including S3-based storage, SES email automation, and CloudWatch monitoring.
- Implemented serverless components using AWS Lambda for event-driven processing and automation workflows.
- Contributed to CI/CD pipelines using Bitbucket for automated builds and deployments.
- Integrated Generative AI APIs (OpenAI / Azure OpenAI) into Node.js services for chatbot responses, multilingual conversations, document summarization, and semantic search.
- Developed React-based admin dashboards and internal tools for workflow and system management.

- Integrated third-party platforms including Salesforce, Genesys Cloud, WhatsApp APIs, and email services.
 - Provided production support, logging, monitoring, and incident resolution for live systems.
 - Led code reviews, mentored junior developers, and ensured Agile/Scrum best practices across the team.
-

Key Projects

Western Union – Chatbot Platform (Lisa)

- Developed backend services integrating chatbot workflows with Salesforce and Genesys Cloud for live-agent escalation.
- Built WhatsApp chatbot APIs and real-time messaging services using Socket.IO.
- Implemented secure API layers with authentication and structured error handling.
- Implemented Google reCAPTCHA validation to prevent bot abuse and enhance security for public-facing chatbot APIs.
- Integrated Generative AI for conversation summarization and multilingual chatbot responses.

Skil.AI – Automation & Document Intelligence Platform (NextCX.ai & Docubaat)

- Designed and implemented document ingestion and automation pipelines using Node.js, AWS S3, and FTP workflows.
- Built REST APIs for document upload, parsing, storage, and semantic search.
- Integrated AI-powered document summarization and search using OpenAI APIs.
- Developed React-based admin interfaces for workflow and chatbot configuration management.
- Improved system performance and response times through backend optimization.

Itech – Automated Document Processing System

- Built backend automation for extracting structured data from uploaded documents.
- Developed REST APIs for workflow orchestration and report generation.
- Implemented secure document storage using AWS S3 with automated email notifications.

Online Visas – Immigration Automation Platform

- Developed backend services for document data extraction and workflow automation.
 - Integrated email systems, Excel processing, and cloud storage pipelines for automated operations.
-

Education

Bachelor of Technology (B.Tech) – Computer Science Engineering, GITAM University 2018

Awards & Recognition

- Exemplary Executor – Delivery Excellence Award (2024)
 - Best Employee of the Year (2022)
 - Achiever Award – Junior Level (2019)
-
